Professional Summary

Information Systems for Business and Management student at President University (ERP concentration) and HR Information Systems intern at Mattel Indonesia, building a career as a Business Analyst / Functional Analyst. Hands-on exposure to HRIS and enterprise systems: analyzing approval workflows, business rules, and system behavior to identify process gaps, and working with business stakeholders and developers to clarify requirements and validate improvements. Currently analyzing a university food-ordering and payment process through stakeholder interviews and observation of day-to-day operations. Comfortable explaining system behavior to users of varying technical backgrounds and translating business needs into functional requirements.

Education

President University | Cikarang, Indonesia — **Sep 2024 – Present**
Undergraduate Program in Information Systems for Business and Management

- Academic Concentration: Enterprise Resource Planning (ERP)
- Scholarship: Jababeka Scholarship Awardee (75% tuition grant for outstanding academic merit)
- Relevant Coursework: Database Management Systems, Business Process Management, Systems Analysis and Design

Work & Organizational Experience

Mattel Indonesia | People & Culture (P&C) Service Hub — **Sep 2026 – Present**
People & Culture — HR Information Systems Intern

Project A: Food Ordering & Payment Process Improvement — **Status: Present**

- Conduct stakeholder discussions and observe administrative and kitchen operations to understand how the food-ordering business works in practice.
- Analyze the end-to-end ordering, payment, and order-status processes to identify opportunities to improve coordination between operations and the information system.
- Evaluate functional requirements, operational constraints, and potential process improvements, favoring practical solutions that avoid unnecessary technical complexity.
- Collaborate with stakeholders and the technical team to clarify business requirements and assess functional improvement opportunities.

Project B: Internal HRIS Workflow Improvement **Status: Completed**

- Analyzed business processes and approval workflows to evaluate functional requirements and identify improvement opportunities.
- Evaluated workflow conditions, business rules, and system behavior against intended business requirements, working with stakeholders and the technical team to support workflow improvement.
- Conducted functional validation and scenario-based testing against agreed business rules.
- Completed supporting deliverables (process maps, system documentation, testing evidence, user guidance) and communicated findings to relevant stakeholders.

Jakarta Mengabdi (Sapa Kampung 2026) **Feb 2026 – Present**
Sponsorship PIC

- Secured IDR 30 million in sponsorship from IKA Universitas Airlangga (IKA UNAIR) through strategic partnership development and stakeholder negotiation.
- Led sponsorship acquisition end to end, from market research and proposals to negotiation, and coordinated committees and external partners to support program execution across Pulau Pramuka and Pulau Tidung.

President University Roblox Developer (PURD) | Cikarang, Indonesia **Apr 2026 – May 2026**
Treasurer & PIC Public Relations

- Managed budgeting, financial reporting, and cash flow, and coordinated external communications and partnerships with internal committees.

President University | Cikarang, Indonesia **Oct 2024 – Jan 2025**
Content Creator Intern

- Supported multi-stakeholder communication campaigns, coordinating publication schedules, cross-functional workflows, and delivery timelines.

Puskesmas Manukan Kulon | Surabaya, Indonesia **May 2024 – Jun 2024**
Administrative Intern

- Managed patient records and administrative data entry in line with accuracy and compliance standards, supporting daily healthcare service workflows.

Academic & Projects

ERP Business Process Analysis **May 2026 – Jun 2026**

- Conducted end-to-end business process analysis across procurement, inventory, supplier management, and manufacturing using Epicor Kinetic, Odoo, and Accurate.
- Identified operational inefficiencies and proposed process improvements aligned with ERP best practices.
- Mapped cross-module business workflows and system integration requirements.

Blibli AI Logistics **Jan 2026 – May 2026**

- Led development of an AI-enabled logistics monitoring solution designed to improve supply chain resilience and operational visibility.
- Designed the business architecture integrating SLA prediction, visual monitoring, and carbon emission optimization, aligning technical and business functions with operational objectives.

Mobile Inventory & Asset Management System **Oct 2025 – Dec 2025**
Full Stack Mobile Developer (Android)

- Developed an end-to-end inventory management solution, designing the relational data structure and reporting dashboard to improve inventory visibility.

Clean Short Fun Day (MTDD) **Jun 2025 – Jul 2025**
Designer & Documentation Specialist

- Led the project's visual identity through posters and Instagram content, and managed event documentation and video highlights.

Amartha-ProxyScore (AI-Based Credit Scoring Solution) **Mar 2025 – Apr 2025**
Business Marketing Lead

- Co-developed a business proposal and pitch deck for an AI credit-scoring framework for unbanked MSMEs, analyzing scalability for 50 million entrepreneurs and target users.

Honors & Awards

- *Certificate of Completion*, Social Business Pitch Competition – City University of Seattle (**Mar 2026**)
